

1 #k8s时间输出到es, 没有timestamp字段无法告警

2 1、es创建pipeline加入timestamp, 索引关联

3

4

5 GET /\_ingest/pipeline

6

7

8 PUT \_ingest/pipeline/insert-timestamp

9 {

10 "description": "Adds a field to a document with the time of ingestion",

11 "processors": [

12 {

13 "set": {

14 "field": "@timestamp",

15 "value": "{{\_ingest.timestamp}}"

16 }

17 }

18 ]

19 }

20

21

22 PUT /kube-events-log-prod/\_settings

23 {

24 "default\_pipeline": "insert-timestamp"

25 }
