扩容云盘存储卷可以参考这篇文档: https://help.aliyun.com/document\_detail/167551.html 执行命令查看pod的挂载详情: /data 改为yaml中的实际路径 /prometheus 根据您的环境是要加上 这个pvc的名称空间, kubectl patch pvc <pvc\_name> -n <name\_space> kubectl patch pvc prometheus-k8s-db-prometheus-k8s-0 -n monitoring -p '{"spec": {"resources":{"requests":{"storage":"500Gi"}}}}'

pkube patch pvc prometheus-k8s-db-prometheus-k8s-0 -n monitoring -p '{"spec": {"resources":{"requests":{"storage":"2000Gi"}}}}'
